ABOUT ME

I am a MERN Stack developer with over 2 years of experience, passionate about creating visually appealing and user-friendly web experiences. I excel in transforming design concepts into responsive websites and applications, leveraging the latest web technologies. With a proven ability to collaborate effectively with cross-functional teams, I ensure project success from inception to deployment. Continuously staying updated with industry trends. You can explore my projects in detail through my portfolio or GitHub.

EXPERIENCE

MERN Stack Developer , Robust Agency

March 2024 - Present

- Leading the development of **Squid Academy**, building scalable backend APIs, implemented Role-Based Access Control (RBAC), and creating interactive frontend features to support schools and educators. [Visit Site](#)
- Acting as Frontend Lead for **MutabiqAI**, an AI governance framework platform, developing a scalable and responsive frontend and implemented Supabase for authentication. [Visit Site](#)
- Serving as Frontend Lead for **AI Change Management**, a platform helping organizations adopt AI responsibly, building a responsive user interface and integrated Supabase authentication for secure user access. [Visit Site](#)
- Contributed as Frontend Developer for **Skin OS**, an AI-powered SaaS platform for beauty businesses, implementing React Query for efficient state management and improved client performance. [Visit Site](#)
- Collaborated with a team of developers and designers to deliver responsive, high-performance, and user-friendly applications across multiple projects.

Frontend Developer , Noble Bridge Technologies

December 2023 - February 2024

- Contributed as a Frontend Developer to **Dream Home**, a furniture store, delivering a responsive and visually appealing user interface. [Visit Site](#)
- Designed and developed responsive, cross-browser compatible UIs using React.js, HTML, CSS, and JavaScript.
- Translated design mockups and wireframes into fully functional user interfaces.
- Implemented reusable components and maintained clean, modular code to improve scalability.
- Worked closely with backend developers to integrate APIs and ensure seamless data flow.
