SKILLS

Front-End Development:

I'm specialized in creating dynamic UIs with React.js, leveraging TailwindCSS, Mantine and much more. Proficient in HTML, CSS, and JavaScript, I build responsive, visually appealing apps with efficient state management using Redux-Toolkit.

Back-End Development:

I excel in developing RESTful APIs using Node.js and Express.js, with experience in server-side rendering and ensuring seamless integration with front-end frameworks like Next.js.

Database Management:

I am proficient in designing scalable database schemas with MongoDB, focusing on efficient indexing and optimization strategies to enhance application performance.

Version Control:

I effectively utilize Git for version control and collaboration, with experience managing repositories on platforms like GitHub and GitLab for streamlined development workflows.

Authentication and Authorization:

Knowledge of implementing user authentication and authorization using techniques like JWT (JSON Web Tokens).

Next.js Expertise:

With in-depth knowledge of Next.js, I build high-performance web applications optimized for speed, scalability, and SEO, blending server-side rendering and static site generation for the best results.

ABOUT ME

I am a MERN Stack developer with 1-2 years of experience, passionate about creating visually appealing and user-friendly web experiences. I excel in transforming design concepts into responsive websites and applications, leveraging the latest web technologies. With a proven ability to collaborate effectively with cross-functional teams, I ensure project success from inception to deployment. Continuously staying updated with industry trends. You can explore my projects in detail through my portfolio or GitHub.

WORK EXPERIENCE

Front End Developer | 2023

Noble Bridge Technologies

MERN Stack Developer | 2024

Robust Agency

PROJECTS

Skin OS: It is an AI-powered SaaS platform designed for beauty businesses, offering advanced skin data collection through image analysis to assess skin conditions and generate detailed statistics. It provides personalized skincare recommendations and tracks client progress over time, enhancing client care and business efficiency.

Squid Academy: A MERN stack Learning Management System tailored for a gaming academy with roles like Admin, School Admin, Teacher, and Student. It streamlines course creation, user management, progress tracking, and interactive learning, providing a responsive and engaging platform for gaming education..

Dream Home: It is a MERN stack furniture store with a sleek Next.js front end, offering a responsive product catalog, advanced filters, and secure checkout. It integrates MongoDB, Node.js, and Express for robust back-end functionality, delivering a seamless e-commerce experience.

Billy Rush: A MERN stack-based Telegram bot app with real-time features using sockets. It includes continuous balance increment on touch, daily reward claims, and auto-updating profit per hour. The app ensures dynamic interactions and automated rewards and much more.
