ABOUT ME

I am a MERN Stack developer with over 2 years of experience, passionate about creating visually appealing and user-friendly web experiences. I excel in transforming design concepts into responsive websites and applications, leveraging the latest web technologies. With a proven ability to collaborate effectively with cross-functional teams, I ensure project success from inception to deployment. Continuously staying updated with industry trends. You can explore my projects in detail through my portfolio or GitHub.

PROJECTS

Skin OS: A Laravel and React-based AI-powered SaaS for beauty businesses. It analyzes skin conditions via image processing, provides personalized skincare recommendations, and tracks client progress. **Visit: Skin OS**

Squid Academy: A MERN stack LMS for a gaming academy with roles like Admin, School Admin, Teacher, and Student. It enables course creation, user management, and progress tracking. **Visit: Squid Academy**

Dream Home: A MERN stack furniture store with a Next.js front end, offering a responsive catalog, advanced filters, and secure checkout. **Visit: Dream Home**

Billy Rush: A MERN stack Telegram bot app with real-time features, balance increment on touch, daily rewards, and automated profit updates.

Imagine: A MERN stack freelancing platform where users post jobs and freelancers complete them. Features include job posting, project management, and messaging. **Visit: Imagine**

Bargain Pro: A Shopify app allowing customers to negotiate product prices. I worked on both admin and store sides using Liquid to enhance customization. **Visit: Bargain Pro**

EDUCATION

Virtual University
Bachelors of Computer Science
